Cabins & Cargo Conversions

Our Commercial Aviation Consulting Group brings together aeronautical engineers, maintenance mechanics, certified aviation technicians, experts in foreign affairs and more, some of them with over 40 years dedicated to commercial aviation. Our professionals undergo formal training, including aeronautical engineering courses in structures and composite materials offered by Boeing, Airbus, and the former McDonnell Douglas.

# Company Overview

## About Us

Aero Embassy Group is dedicated to providing top-tier consulting and maintenance services for the civil and commercial aviation industry. With a team of seasoned professionals, including engineers, certified mechanics, and technical experts, we bring over 40 years of industry experience to every project. Our extensive expertise ensures that we meet the highest standards of safety, efficiency, and compliance.

## Mission

To provide top-tier consulting and maintenance services for the civil and commercial aviation industry, ensuring the highest standards of safety, efficiency, and compliance, backed by over 40 years of industry experience.

## Vision

To be global leaders in aviation solutions, recognized for our excellence, innovation, and commitment to operational safety and efficiency.

# Our Services

## Checks & Projects Development, Management & Goals Control

Cabin conversion projects & checks. Advisory, development, representation & team coordination.

Accurate & organized data allows better decision-making and provides background for further planification.

Optimization of Project and Maintenance Gantt Charts to ensure the goals like TAT & costs.

KPI's to follow up the service. Monitoring risks to take proactive actions and provide early notification of delays to facilitate the reorganization of commercial operations.

## Records & Manuals – Development, Revision & Reliability

Records revision & management in compliance with the Authorities' Rules and organized for easy accessibility.

Development of technical DOCs & special maintenance programs as needed by the Operator.

MCM / MGM / Quality Manuals update and development to be approved by the Authority of Registry.

Improve the Operators Maintenance Program.

Whether you require on-site engineering support, data entry, or certified mechanics for maintenance projects, our team is prepared to deliver exceptional service and optimize your aviation operations.

# Our Services

## Deliveries, Preservation, Ferry Flights & Special Processes

- Delivery of airplanes managing the whole process on behalf the Operator as required.
- Airplane preservation. Tech DOCs, monitoring & compliance control up to return into service.
- Technical support for ferry flights with certified FAA A&P mechanics
- Special painting which requires specific material supply, design, procedures and structure cautions.

## Engineering, Budgets, Logistics & Recoveries

- Advisory & support for major repairs.
- Material logistics and purchase processes strategy for the best utilization of international network minimizing supply lead times.
- Budget analysis & review.
- Recovery of airplanes. Advisory for option evaluations, development of documents and representation on site.

# Our Services

## MROs Analysis - Quality & Certification Processes

### Assessment of MROs

Evaluate their strengths and weaknesses based on the Operator's standards.

### MRO layouts

Advice on MRO layouts for new shops or existing ones that need to extend or reorganize their facilities

### Support

Providing support to prepare protocols and manuals for the certification process or facing the next authority inspection.

### Monitoring & Optimization

We continually analyze data to refine and optimize our efforts.

# Special Services

Advising, evaluating, and guiding projects in Argentina.

## Solution

Our Government Liaison service aims to streamline the process of securing domestic air routes by facilitating efficient communication and negotiation with the current government

## Outcome

We establish positive connections with relevant unions and other civil institutions necessary to initiate operations. Furthermore, our consultants offer comprehensive advisory and operational services to support maintenance and operations.

# Testimonials

“ **Fernando Darino**  
House of Representatives of Argentina

"We've never seen such an experienced aeronautic engineering team gather before. Each member brings unmatched knowledge to the table."

“ **Javier Palencia**  
Airworthiness Representative (DAR)  
for Argentine Authority

"Complexity of commercial aviation in current times requires an outstanding group of this magnitude to provide adequate and efficient support for it's needs."
